Project

Profile

I'm a Bachelor of Computer Application graduate with hands-on experience in Java, RDBMS, Data Structures, and UI design, gained through an internship at Aspire Systems. Proficient in C, C++, JavaScript, ReactJS, NodeJS, MongoDB, and WordPress, I'm passionate about solving real-world problems through innovative technology and design. With a focus on continuous learning and collaboration, I bring a creative, solution-driven approach to every project.

Education

BACHELOR OF COMPUTER APPLICATION - 75%

2021 – 2024 | Vellore, India

Government Thirumagal Mills College, Gudiyatam

Professional Experience

PK VENTURES PVT LTD

Feb 2025 – present | Vellore, Tamilnadu

Full Stack Developer & Team Lead

- Promoted to **Team Lead** while continuing as a **Full Stack Developer**, managing multiple client projects.
- Led the migration of in-house billing software from **PHP to React**, enhancing performance and UI/UX.
- Delivered several **WordPress-based websites** including: *Vellore Civil Engineer Association, Achieve Builders, PVK, GVP, and Kavitha Embroidery.*
- Designed and customized the **official company website** using WordPress.
- Developed **Flutter mobile apps** (Android & iOS):
Plant Watering System – automated watering reminder.
Car Parking System – smart slot management app.
- Built a complete **e-commerce website** – **Yuvadvine Store**, fully developed in **WordPress** with integrated payments.
- Handled both **development** and **client coordination**, ensuring quality and on-time delivery.

Corp Wings IT Service & Consultancy

Aug 2024 – Feb 2025 | Vellore, India

Internship to Full-Time Role – Full Stack Developer

Started as an intern and was offered a full-time position based on performance. At Corp Wings, I contributed to both in-house and client projects, working extensively with the MERN stack. I collaborated with cross-functional teams to deliver scalable, responsive web applications, implemented full-stack features, and modernized legacy codebases.

Key Projects & Contributions:

- **Digital Menu Web Application**

MongoDB – Used for storing restaurant menus, categories, and item details.

Express.js – Handled backend API routes for managing menu items and authentication.

React.js – Built an intuitive, responsive front end for both restaurant admins and customers.

Node.js – Implemented server-side logic and API integrations.

Additional Contribution – Integrated **Razorpay** for secure and seamless online payments.

- **Sree Balamurugan Traders Website**

MongoDB – Managed product catalog, user accounts, and order tracking.

Express.js – Built backend APIs to power features like product filtering and checkout.

React.js – Designed the e-commerce UI including product listings, filters, and cart.

Node.js – Connected frontend with database and handled routing.

Additional Contribution – Integrated **Cloudinary** to store and deliver optimized product images.

- **Sribramawood Creations Website**

Tech Stack – Built **purely using HTML, CSS, and Bootstrap**, with no backend logic.

Contribution – Developed a clean, responsive website to visually showcase wooden products.

- **Green Naturals Gudiyattam Website**

React.js Only – Fully developed using **React.js** with no backend server or database.

Contribution – Delivered a fast, user-friendly single-page application optimized for SEO and performance.

- **Green Naturals Billing Software**

MongoDB – Used to maintain records of customers, transactions, and invoices.

Express.js – Created backend APIs for generating bills and reports.

React.js – Built a user-friendly frontend to manage billing and inventory operations.

Node.js – Managed backend logic, user sessions, and API integrations.

- **Company Website Upgrade**

React.js Only – Migrated the static HTML/CSS site to a **React-based frontend**.

Contribution – Collaborated with a senior developer to modernize the UI using reusable components and responsive design.

Note – No backend logic used; static data handled within React.

Aspire Systems (India) Pvt. Ltd.

Apr 2024 – Jul 2024 | Tamilnadu, India

Internship Trainee – Full Stack Developer

- Mastered problem-solving, algorithms, and Java programming.
- Strengthened RDBMS and database management skills.

Freelancer

Vellore, Tamilnadu, India

Full Stack Developer & WordPress Developer

- Collaborating with a small team on a **Real Estate Web App (Dubai)** – built using **React.js, Next.js, and Supabase**; currently under development.
- Independently designed and developed the following WordPress websites:

Photo Studio Website – A visually engaging and responsive site to showcase photography services and portfolios.

Sports Academy Website – Built for a local academy to manage schedules, programs, and contact inquiries.

Personal Portfolio Website – Developed to present professional work, skills, and project showcases.

- Managing end-to-end development: from client communication, UI/UX, frontend/backend coding, to deployment.
